👤 Profile

I have 2 years experience in python backend developer with good technical knowledge in python Django and my-sql. I have good experience in writing code in python and Django frameWork React js in the frontend development along with backend.

📁 Professional Experience

Python Full-Stack Developer

Inmakes infotech

05/2024 – 08/2026 | Kochi-Kerala

🎓 Education

BSC Computer Science

Bharathidasan University

2021 – 2024 | Kullithalai

CGPA: 8

📁 Projects

Online Exam System

<https://exam.shivamagiconstruction.com>

Developed a full-stack Online Examination System using Python, Django, Django REST Framework, MySQL, HTML, CSS, JavaScript, and Bootstrap. The application enables educational institutions to conduct online exams, manage students, and track performance efficiently.

Technologies Used: Python, Django, Django REST Framework (DRF), MySQL, HTML, CSS, JavaScript, Bootstrap, Git, REST API, JWT Authentication.

Key Features:

- Developed secure user authentication and authorization with role-based access for Admin, Teacher, and Student users.
- Created modules for student registration, course management, exam scheduling, and question management.

🔧 Roles & Responsibilities

- Identifying and fixing defects or bugs in the codebase
- Collaborating with cross-functional teams to design, develop, and ship new features
- Developed and maintained web applications using Python, Django, Django REST Framework, and React.js.
- Developed REST APIs for different application modules and integrated them with the React.js frontend.
- Worked on MySQL and PostgreSQL databases, including database operations, queries, and data management.
- Developed CRUD operations for managing application data and business modules.
- Integrated frontend applications with backend APIs and handled API responses and errors.
- Writing and maintaining efficient, reusable, and reliable Python code

📁 Technical Skills

Programming Languages

- Python

Web Frameworks & Libraries

- django , Flask , numpy ,Pandas

Frontend

- HTML5, CSS3, JavaScript, jQuery, Bootstrap, Tailwind CSS, React.js , Next.js

Backend & Databases

- MySQL, PostgreSQL, MongoDB

API Development & Tools

- RESTful APIs, CRUD Operations, Postman (API Testing)

Version Control & Deployment

- Git, GitHub, AWS

- Implemented online exam functionality with automatic answer evaluation and instant result generation.
- Designed dashboards for students and teachers to monitor exam performance, attendance, and progress.
- Built RESTful APIs using Django REST Framework for seamless frontend-backend communication.
- Developed result analytics with percentage calculation, pass/fail status, and performance reports.
- Integrated email notifications for exam results and important updates.
- Managed database design and optimization using MySQL for efficient data storage and retrieval.
- Followed Agile development practices and used Git for version control and project management.

AI-Based Virtual Dress Trial Application

Technologies: Python, Django, Django REST Framework, React.js, OpenCV, AI/ ML, MySQL, AWS, GitHub

- Developed an innovative AI-powered Virtual Dress Trial Application that enables users to virtually try outfits using uploaded dress images and interactive avatar-based visualization.
- Built a complete full stack application using React.js for dynamic frontend development and Django REST Framework for scalable backend API services.
- Implemented AI/ Image Processing functionalities using OpenCV for dress mapping, image alignment, background handling, and virtual outfit visualization.
- Designed secure authentication and user management modules with login, registration, password management, and JWT-based authorization.
- Developed responsive and modern UI components to deliver a smooth and engaging user experience across desktop and mobile platforms.
- Integrated advanced REST APIs for image upload, dress processing, user interaction, and application workflow management.
- Optimized backend performance and database operations using MySQL, improving image processing efficiency and application scalability.
- Utilized AWS cloud services for application deployment, storage handling, and scalable hosting solutions.

Languages

- Tamil
- English

Personal Details

Name : Manjuriya

Address: 1/113 palayapeyanapalli,
periyamuthur (post), krishnagiri-635101,
krishangiri(dt)

- Collaborated with development workflows using Git and GitHub while following clean architecture and reusable coding practices.
- Focused on delivering a real-world fashion-tech solution by combining Full Stack Development with AI-based virtual try-on technology to enhance digital shopping experiences .
