Profile

I have 3 years experience in python backend developer with good technical knowledge in python Django and my-sql.

I have good experience in writing code in python and Django frameWork React js in the frontend development along with backend.

Work Experience

Python Full-Stack Developer

Inmakes Infotech

24/10/2023 – 14/08/2026

Assistant Software Engineer

RELENTLESS SYSTEMS

09/02/2022 – 19/10/2023

Education

Master of science

Arignar anna college (arts&science)

08/2022 | Krishnagiri

Projects

Learning Management System

- Developed a **Learning Management System (LMS)** using **React.js (Frontend)** and **Django + Django REST Framework (Backend)**.
- Implemented **Role-Based Access Control (RBAC)** with different user roles: **Admin, Instructor/Teacher, and Student**.
- Designed course creation and management features, supporting **videos, documents, and quizzes**.

Roles And Responsibilities

Python Developer :

- Writing and maintaining efficient, reusable, and reliable Python code
- Identifying and fixing defects or bugs in the codebase
- Collaborating with cross-functional teams to design, develop, and ship new features
- Integrating data storage solutions and working with data pipelines
- In general, a Python developer plays a key role in the design, development, and maintenance of software applications and systems that are built using the Python programming language. They should have strong problem-solving skills and be able to work effectively as part of a team.

Skills

- Frontend Technologies: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Tailwind CSS, Vue.js, Bootstrap
- Programming: Python
- Database : SQL , MYSQL , PSQL
- Framework & Libraries: Django, REST API, JWT and Flask,FAST API
- AWS , GIT , Git Hub and Visual Studio , pytest , Azure,AWS Bedrock

Achievement And Tasks

- Creating new Databases, Desining Database tables relevant to our project. Working with CRUD Operation Queries in My SQL workbench

- Enabled **student enrollment**, personalized dashboards, learning progress tracking, and assessment submission.
- Integrated **Quizzes/Assignments** module for evaluating student performance with auto/manual grading.
- Built **Communication tools** including messaging and discussion forums for collaboration.
- Added **Analytics & Reporting** for tracking performance of both students and courses.
- Implemented secure authentication using **JWT, password encryption**, and controlled access.
- Designed scalable REST APIs with proper **CRUD operations** for all major modules.
- Optimized UI/UX with **responsive React components** for better accessibility and user experience.
- Used **MySQL/PostgreSQL** for database management and efficient data retrieval.

- Query Databases using the SQL server administrative tools.

Languages

- Tamil
- English
